WARNING

Users and guardians are requested to read this manual carefully before use and keep it properly for future reference. Failure to follow this manual may affect the safety of children.

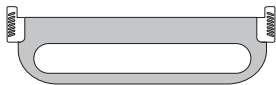

- Incorrect installation may cause the bednest to detach from the mattress, resulting in injury or even death of infants and young children. Do not use it anywhere other than a bed.
- The four-sided enclosure mode is suitable for ages 0-18 months.
- The single-sided guardrail mode is suitable for children over 18 months old.
- If any accessories or components of this product are damaged or missing, please stop using it. Improper use or external impact may cause damage to the product.
- Please ensure that the bednest is correctly installed between the mattress and the bed frame. Do not use it when the fixing devices are not firmly connected to the bed or mattress.
- Please ensure that the bednest is correctly connected and that the supporting feet are positioned under the mattress.
- After installation, do not pull or tug it up and down with brute force. Please check it regularly to ensure proper installation and normal functionality.

- Please ensure that the bednest is kept at a certain safe distance from fire sources and power sources (such as electric heaters, gas stoves, etc.).
- Do not leave hard objects, ropes, curtain cords, or other items that may pose a risk of strangulation or suffocation on the bed or hanging on the bednest.
- Never leave your child unattended, and beware of the risk of pinching the head or limbs.
- To avoid the risk of entanglement, do not let infants and young children wear objects such as ribbons, ropes, pendants, etc., when using this product.
- This product is not suitable for bunk beds, water beds, air mattresses, round beds, or baby cribs. The baby bedside sleeper must not be used as a substitute for a cot, as it does not provide the same level of safety as a cot.
- The baby bedside sleeper is not suitable for sleep surfaces that are more than 600mm above the ground.
- This product has preventive and protective effects, but it does not have the function of isolating all dangers or accidents.
- Before using this product, ensure that all locking devices are in the locked position.

baby bedside sleeper

② Baffle plate

③ Fixed strap

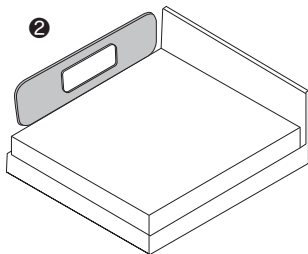

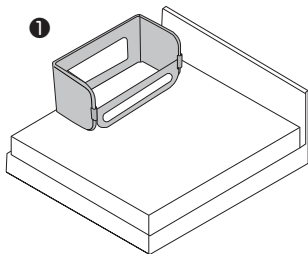

2. Usage Overview

Four-sided Enclosure Mode:

Suitable age range: 0-18 months (Figure ①)

Single-piece Guardrail Mode:

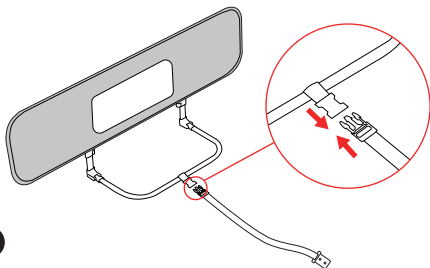

Suitable age range: Over 18 months (Figure ②)

3. Product Installation

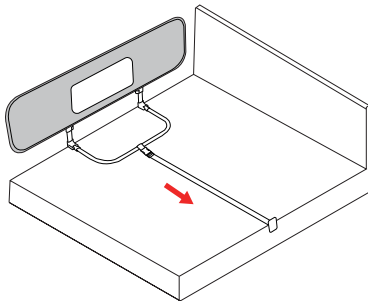

3-1

Installing the fixed strap: after unfolding the guardrail, first install the fastening strap: insert the "male buckle" of the fixing strap into the "female buckle" at the bottom of the bracket. The installation of the fastening strap is now complete.

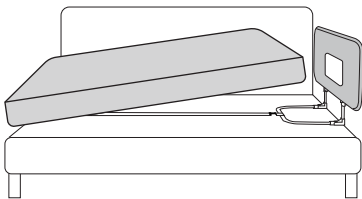

3-2

Lift the mattress: first, lengthen the fixed strap. Place the bednest on the bed frame and make sure it is tightly against the bed edge. Then, fasten the fixed strap and pull it to the other side of the bed.

3-3

Place the mattress back: return the mattress to the bed frame and firmly press down on the guardrail's bottom bracket and the fixed strap.

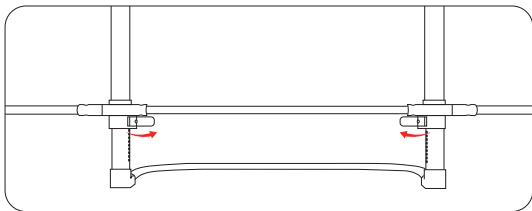

3-4

Tighten the fixed strap: Pull the fastening strap tight, check the stability of the guardrail, and it is ready for use once confirmed secure.

4. The baby bedside sleeper adjustment

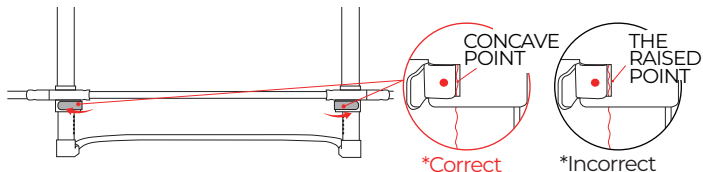

4-1

Unlocking by opening the lock catch: Simultaneously push aside the two paddles at the bottom to unlock, and then the guardrail can be adjusted for lifting height.

4-2

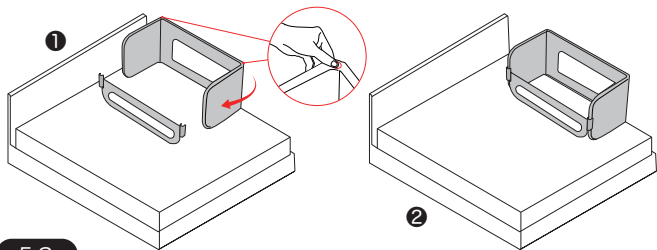

After adjusting the guardrail to a suitable height, fasten and lock the two paddles back into place—the guardrail will then be fixed securely.
 (Note: When closing the lock catch, the concave part of the adjustment foot's gear must align with the convex point of the paddle. Otherwise, the paddle will not close properly.)

5. Installation of enclosures

5-1

Fold the guardrails on both sides: Press the button, fold the left and right guardrails inward to hold the mattress, and then lock the guardrail height adjustment buckle (Figure ①).

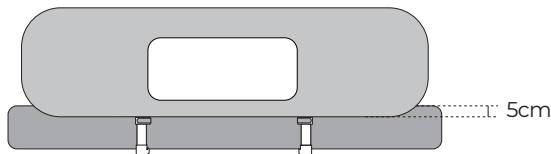

5-2

Install the baffle: Clamp the clamping grooves on both sides of the baffle to the surrounding tubes at both ends of the guardrail, and the installation of the four-sided enclosure mode is completed. (Figure ②: To remove the baffle, simply pull it out from the surrounding tube.)

6. Installation of single-sided guardrail mode

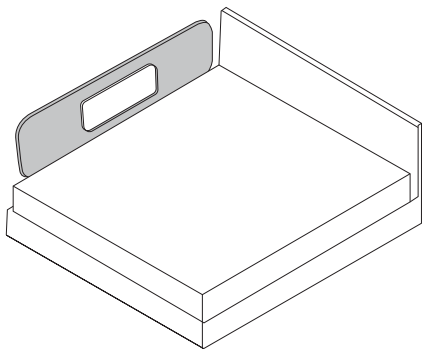

6-1

Adjust the height of the guardrail: Fully unfold the guardrails on both sides, open the paddles, and raise or lower the guardrail to a proper position. (The upper edge of the mattress is more than 5cm higher than the lower edge of the cloth cover)

6-2

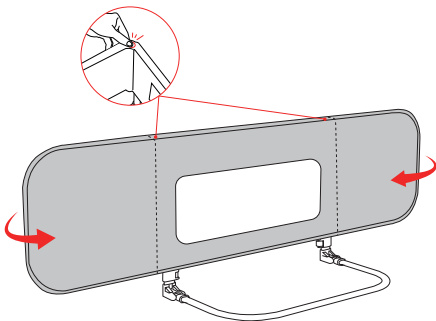

Lock the height adjustment paddle: After adjusting the guardrail to the appropriate height, lock the height adjustment paddle, and the installation of the single-sided guardrail mode is completed.

7. Folding and Storage

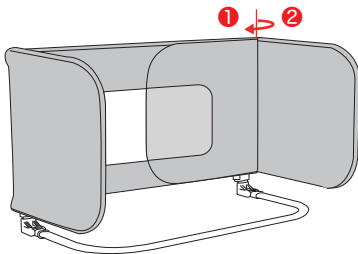

7-1

Fold the guardrails on both sides: Press the button and fold the bed rails inward one after another.

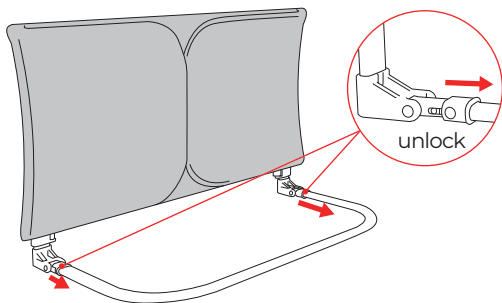

Two-stage folding: Press the button and fold inward; after a "click" sound, the guardrail will be fixed.

Press the button again and fold inward; after a "click" sound, the guardrail will be fixed.

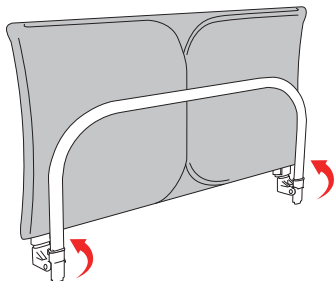

7-2

In the direction of the arrow, simultaneously toggle the folding switches on both sides of the pipe fitting;

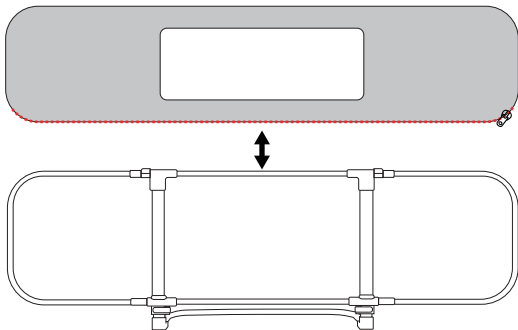

Fold the bottom bracket: Toggle the folding switches on both sides of the pipe fitting at the same time, and the bottom bracket can be folded upward for storage.

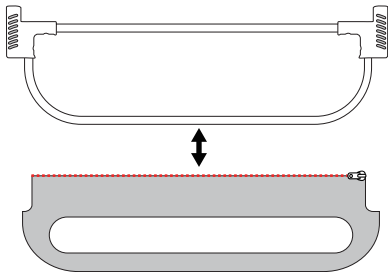

8. Disassembly, Assembly and Washing of the Cloth Cover

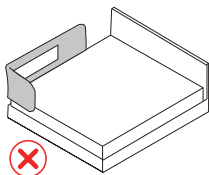

Unzip the zipper at the bottom of the guardrail main body to remove the cloth cover. After washing, slide the cloth cover downward along the arrow and zip it up to complete the installation.

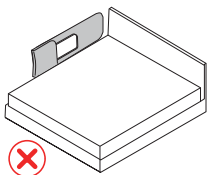

Unzip the zipper at the bottom of the baffle to remove the cloth cover. After washing, slide the cloth cover downward along the arrow and zip it up to finish the installation.

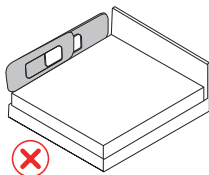

9. Examples of Incorrect Use

Using the product with both side brackets not fully unfolded to form a "right angle" (i.e., in a partially folded state.).

Using the product with both side brackets not fully unfolded, such as in an "inwardly folded" state.

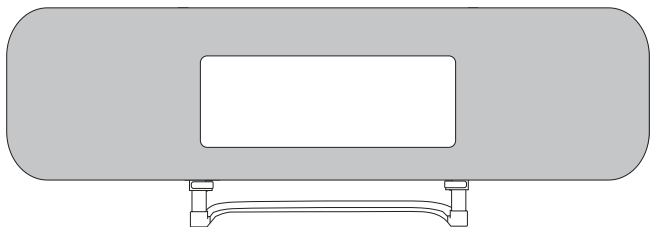

Using two guardrails in an overlapping manner.

10. Mattress Size Compatibility Information

- This product is suitable for mattresses with a thickness of 10-30cm, and the guardrail has a lifting function.
- Four-sided enclosure mode: The main body of the guardrail and the baffle are installed by pressing against the mattress.
- Single-sided guardrail mode: When installing, the upper edge of the mattress must be 5cm or more higher than the lower edge of the cloth cover.
